***If you fabricate metal, get the tough, reliable
positioner you need, and save up to half the cost.***

Durability you can bank on

The ALM MHL-2P Positioner Lift eliminates old-fashion belts, chain transfer and screw systems prone to wear and tear. Employing a unique hydraulic cylinder design with a continuously engaged dual locking system, our MHL-2P Positioner Lift ergonomically brings the work to the worker, safely, and with unsurpassed flexibility for your application.

Flexibility to meet your changing needs

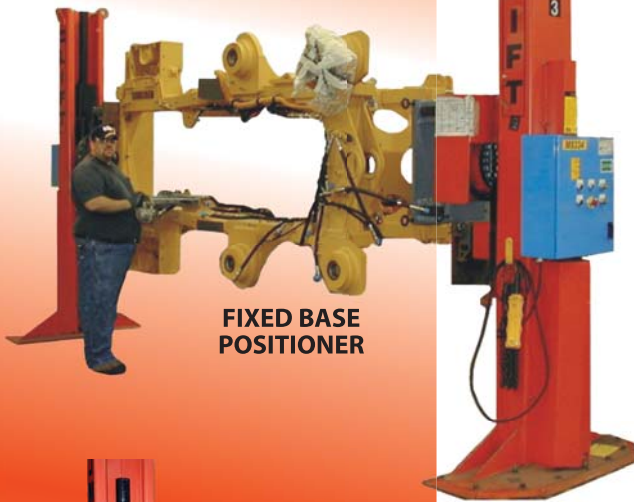

ALM is known for customer-driven product innovation, and our MHL-2P Positioner Lift is proof. The easy to install fixed base positioner lift is custom manufactured to your piecework specified weights and sizes. With unlocking and repositioning capabilities of its slave column, the adjustable base positioner lift is designed to work with multiple sized assemblies.

Put us to the test!

You can increase production throughput up to 35% or more.

ALM Customers tend to stay ALM customers

The MHL-2P Positioner Lift Benefit Statement

- Greater output in less time**
 The MHL-2P has fast overall cycle time, positioning your piecework in less than sixty seconds.
- Lower capital expenditure**
 The MHL-2P is an efficient design using much less space and power than over-sized alternatives that cost more to buy and to run.
- Ergonomically and environmentally responsible**
 The MHL-2P saves your employees' backs with a "one-hand, one-button" ease of operation designed in! Then, NEMA 4 control enclosures protect your people and your investment against environmental hazards.
- Greater operational security**
 ALM lowers your operation risk profile by backing up our quality assurance practices with a lifetime warranty on carriage bearings, and the kind of responsive, long-life assurance available only from a "Made in the USA" manufacturer.
